

**CONSTRUCTION UPDATE #3**

***Lord Jesus, help us build a beautiful church!***

The very good weather of recent weeks has been a boon for our construction process. Lots of important site work has been proceeding well, as we head for the start of work for the foundation on the new church.

We don't want to disappoint anyone, but the beautiful topsoil you can see being moved around by those big trucks is being used already on site and more will be needed, to raise various grade levels and to fill in depressions. So, we are sorry, but those who were asking if they could use this soil to add to their gardens or fill in some holes at home will have to look elsewhere.
