

CONSTRUCTION UPDATE #7

Lord Jesus, help us build a beautiful church!

We continue to benefit from extraordinary weather that has allowed workers to pour the concrete foundations for our new church. This is a blessing.

We have also made progress towards getting our drinking fountains back in operation in our present building. We are upgrading the water system and sizing it for future use. We have signed a contract, for \$35,000, to install two 300 gallon water tanks in closets in the lower level, along with centrifugal pumps, pressure tanks, sediment filters, water softeners, disinfectant materials, etc., to be sure our drinking water is safe and stays fully compliant with Health Department regulations. That equipment is on order, and should be installed in four weeks.
